

Thy Nguyen

Greenacres, FL | 561-225-0245 | thymnngn@gmail.com | linkedin.com/in/thy-nguyen-fau2022 | github.com/Thymnngn

OBJECTIVE

Computer Science graduate with experience delivering business intelligence solutions, stakeholder training, and AI-powered applications. Skilled in translating business requirements into technical solutions through SQL analytics, cloud technologies, and customer-focused presentations. Passionate about helping organizations solve business challenges through technology and data-driven decision making.

WORK EXPERIENCES

Florida Atlantic University, Bachelor of Science, in Computer Science, GPA: 3.87 / 4.0
Minor In Cyber Security | Certificate in Data Science

May 2026

TECHNICAL SKILLS

Programming Languages: Python, SQL, MongoDB, React, HTML, CSS, Javascript

Frameworks & Tools: Microsoft Azure, Git, Oracle Fusion, Flask, AWS, Simulink, Tableau, VSCode,

Certification: Oracle Cloud Infrastructure Foundation, Oracle Foundation AI, AWS Cloud Quest: Cloud Practitioner

WORK EXPERIENCES

ADT

Boca Raton, FL

Oracle Fusion Engineering Intern | Oracle Fusion

May 2025 - July 2025

- Delivered a capstone training session to **20 stakeholders** demonstrating Oracle OTBI navigation and reporting, directly mirroring the demo and knowledge-transfer skills.
- Developed **SQL-based analytical reports** within Oracle's Revenue Management module, translating raw data into actionable business insights for non-technical audiences.
- Authored comprehensive **documentation** and training materials enabling independent adoption of OTBI workflows across the team, demonstrating the ability to scope and deliver enablement engagements.

PROJECTS

Owl Search | Python, Gradio, Groq

June 2026

- Architected OWL Search, an end-to-end **RAG pipeline** ingesting 10+ university documents, handling preprocessing, semantic chunking, vector embedding, and grounded LLM response generation with source attribution on every query.
- Designed and executed a **5-question evaluation framework** assessing retrieval accuracy and failure modes, demonstrating the analytical rigor used to validate AI systems before customer-facing deployment.

AI-Powered Autonomous Pentesting Agent | Python, LiteLLM, Claude Sonnet, Docker

April 2026

- Developed an **autonomous penetration testing agent** in Python targeting the OWASP Juice Shop environment, integrating LiteLLM and Claude Sonnet to support AI-driven security analysis and tool orchestration.
- Engineered **six custom offensive security tools**, including endpoint reconnaissance, SQL injection testing, JWT analysis, XSS probing, HTTP automation, and directory fuzzing to automate vulnerability discovery workflows.
- Applied **AI-assisted reasoning** and automated attack-path exploration to solve 7 Juice Shop security challenges while optimizing API usage within a constrained Anthropic API budget.

Multi Sensors Real Time Signal Analysis | Python, NumPy, TensorFlow, scikit-learn

Aug 2025 - Nov 2025

- Developed a **1D Convolutional Neural Network** trained on the MIT-BIH Arrhythmia Dataset to classify ECG signals into normal and abnormal categories.
- Achieved **98% classification accuracy** on test data from the dataset, demonstrating the model's capability for automated arrhythmia detection.
- Collaborated with a team of five to develop a System On a Chip biosensor system and integrate ML-based classification.

LEADERSHIP

Student Organization Name

President of FAU Girls Who Codes

Jan 2024 – May 2026

- Organized and coordinated** technical workshops, coding sessions, and professional development events for students interested in computer science and technology careers.
- Coordinated** logistics and budgeting for club events with **10–15 student participants**, ensuring all activities stayed within budget and on schedule.
